Professional Profile

Web Developer with **6 months of experience** in real production environments. Focused on web applications using **React** and **Laravel**, maintenance of existing systems, and collaborative work with technical and management teams. Seeking **remote** opportunities to continue growing technically and adding value to real projects.

Experience

Web Developer / Project Manager Assistant
PC Ingeniería, Bogotá
06/2023 – Present

- Development and maintenance of internal and customer-facing web applications using React and Laravel
- Implementation of automation scripts to optimize repetitive maintenance tasks
- Bug fixes, functionality improvements, and support for existing production code
- Direct collaboration with project manager on technical planning and feature delivery

Systems Technician
JASA IT SAS, Bogotá
09/2024 - 12/2024

Preventive equipment maintenance, inventory management in GLPI, and preparation of accurate technical reports.

Education

Information Technology Technologist
UNIMINUTO University, Bogotá
01/2024 - 12/2026

Systems Technician
National Learning Service (SENA), Bogotá
2022 - 2023

Activities

Developed personal projects in my free time, including a fullstack task manager with Python Flask, SQLAlchemy, and React.js (Vite + TailwindCSS), integrating secure authentication with JWT tokens.

Developed my personal portfolio using React.js, Vite, and TailwindCSS, applying responsive design principles and frontend development best practices.

Developed a digital professional presentation card with React.js, Vite, and TailwindCSS.
